

GROUP 1 PROJECT

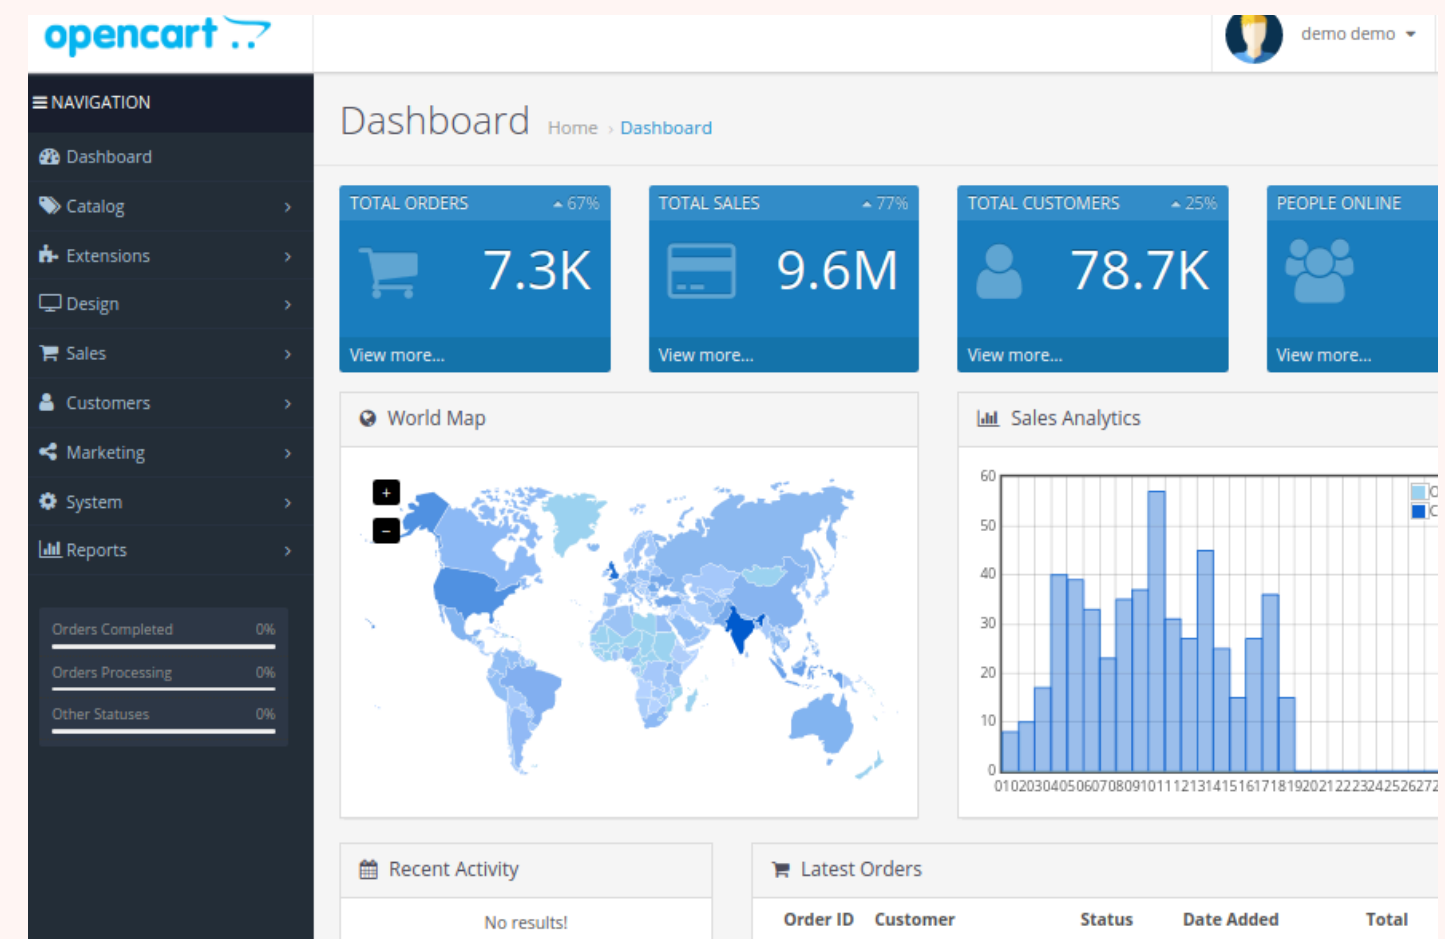

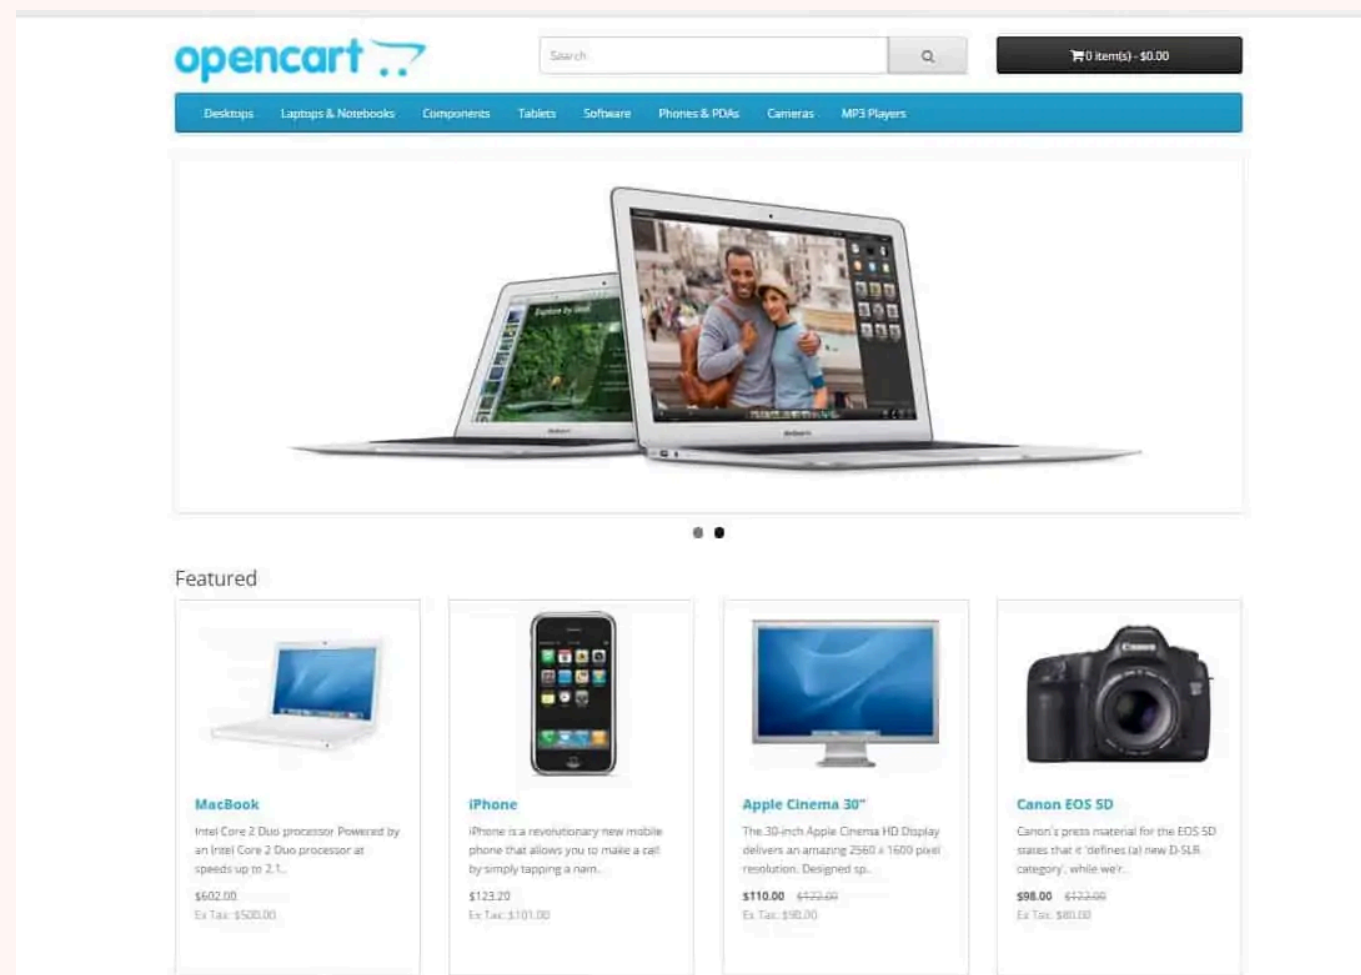

OUR TEAM

1. Rawan Ashraf
2. Sondos Gad
3. Waad Ayman
4. Mariam Essam
5. Sumaya Muhamed
6. Sara Abdelmoneim

OUR WEBSITE

we worked on demo and local host open cart

PROJECT OVERVIEW

- We tested OpenCart on Localhost using XAMPP.
- We covered Manual, UI, API, and Database Testing.
- We built Automation Testing for DemoBlaze.
- We performed Performance Testing with JMeter.
- All documents and code are uploaded on GitHub.

Tools: Google Sheets – MySQL – Postman – Selenium – JMeter – GitHub

Our Test plan

In Test plan We focused on:

- 1- project information
- 2-TeamMembers and Roles
- 3-Scope
- 4-website Features
- 5-entry criteria
- 6-exit criteria
- 7-test deliverables
- 8-testing types
- 9-Risks and mitigation plan
- 10-references
- 11-Conclusion

12.Approval	
13.References	
14.Conclusion	

2.2 Roles and Responsibilities		
Name	Role	Responsibilities
Rawan Ashraf	Team Leader / QA Tester	Leads the team, plans the testing schedule, reviews reports, and works with the team in all testing activities.
Somaya Muhammed	QA Tester	Works with the team on manual, automation, API, and database testing.
Waad Ayman	QA Tester	Works with the team on manual, automation, API, and database testing.
Sara Abdel-Moneim	QA Tester	Works with the team on manual, automation, API, and database testing.
Sondos Gad	QA Tester	Works with the team on manual, automation, API, and database testing.
Mariam Essam	QA Tester

Our sprints

- we start with writing test cases we choose Google sheet bec it's eazy and help me as a leader team with daily report and see what happend day by day
- Each one take a feature in the website and start to write The manual Test cases (Login in / cart/navigation/checkout/ search/products)

Test ID	Test Case Description	Prerequisites	Steps	Test Data	Step Actions	Expected Result	Actual Result
TC-001	Verify that the user can login successfully	User is registered	1. Go to the login page	Valid email and password	Click on the login button	User is logged in successfully	User is logged in successfully
TC-002	Verify that the user can register successfully	User is not registered	1. Go to the register page	Valid email and password	Click on the register button	User is registered successfully	User is registered successfully
TC-003	Verify that the user can add items to the cart	User is logged in	1. Go to the product page	Valid product ID	Click on the add to cart button	Item is added to the cart	Item is added to the cart
TC-004	Verify that the user can view the cart	User is logged in	1. Go to the cart page	Valid cart ID	Click on the view cart button	Cart is displayed	Cart is displayed
TC-005	Verify that the user can checkout successfully	User is logged in	1. Go to the checkout page	Valid cart ID	Click on the checkout button	Checkout is successful	Checkout is successful

Test ID	Test Case Description	Prerequisites	Steps	Test Data	Step Actions	Expected Result	Actual Result
TC-006	Verify that the user can search for products	User is logged in	1. Go to the search page	Valid search term	Click on the search button	Search results are displayed	Search results are displayed
TC-007	Verify that the user can view product details	User is logged in	1. Go to the product page	Valid product ID	Click on the product name	Product details are displayed	Product details are displayed
TC-008	Verify that the user can add items to the cart	User is logged in	1. Go to the product page	Valid product ID	Click on the add to cart button	Item is added to the cart	Item is added to the cart
TC-009	Verify that the user can view the cart	User is logged in	1. Go to the cart page	Valid cart ID	Click on the view cart button	Cart is displayed	Cart is displayed
TC-010	Verify that the user can checkout successfully	User is logged in	1. Go to the checkout page	Valid cart ID	Click on the checkout button	Checkout is successful	Checkout is successful

Test ID	Test Case Description	Prerequisites	Steps	Test Data	Step Actions	Expected Result	Actual Result
TC-011	Verify that the user can login successfully	User is registered	1. Go to the login page	Valid email and password	Click on the login button	User is logged in successfully	User is logged in successfully
TC-012	Verify that the user can register successfully	User is not registered	1. Go to the register page	Valid email and password	Click on the register button	User is registered successfully	User is registered successfully
TC-013	Verify that the user can add items to the cart	User is logged in	1. Go to the product page	Valid product ID	Click on the add to cart button	Item is added to the cart	Item is added to the cart
TC-014	Verify that the user can view the cart	User is logged in	1. Go to the cart page	Valid cart ID	Click on the view cart button	Cart is displayed	Cart is displayed
TC-015	Verify that the user can checkout successfully	User is logged in	1. Go to the checkout page	Valid cart ID	Click on the checkout button	Checkout is successful	Checkout is successful

Test ID	Test Case Description	Prerequisites	Steps	Test Data	Step Actions	Expected Result	Actual Result
TC-016	Verify that the user can search for products	User is logged in	1. Go to the search page	Valid search term	Click on the search button	Search results are displayed	Search results are displayed
TC-017	Verify that the user can view product details	User is logged in	1. Go to the product page	Valid product ID	Click on the product name	Product details are displayed	Product details are displayed
TC-018	Verify that the user can add items to the cart	User is logged in	1. Go to the product page	Valid product ID	Click on the add to cart button	Item is added to the cart	Item is added to the cart
TC-019	Verify that the user can view the cart	User is logged in	1. Go to the cart page	Valid cart ID	Click on the view cart button	Cart is displayed	Cart is displayed
TC-020	Verify that the user can checkout successfully	User is logged in	1. Go to the checkout page	Valid cart ID	Click on the checkout button	Checkout is successful	Checkout is successful

- The sum of Test cases is 367 = Passed 321 and Failed 46

Our sprints

Then we Start To download local host OpenCart :

- Xampp
- php my admin
- Open cart

Our sprints

Then we Start To download :

- Postman (for Api Testing)
- My SQL (for DataBase testing)

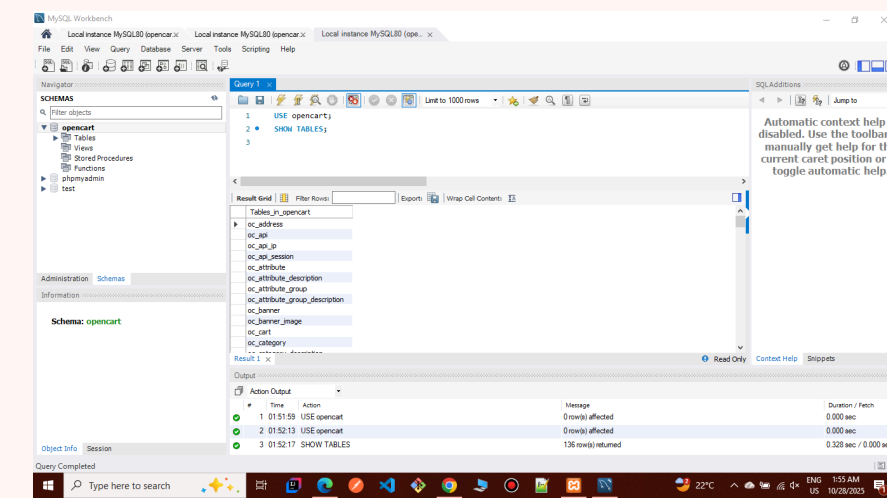

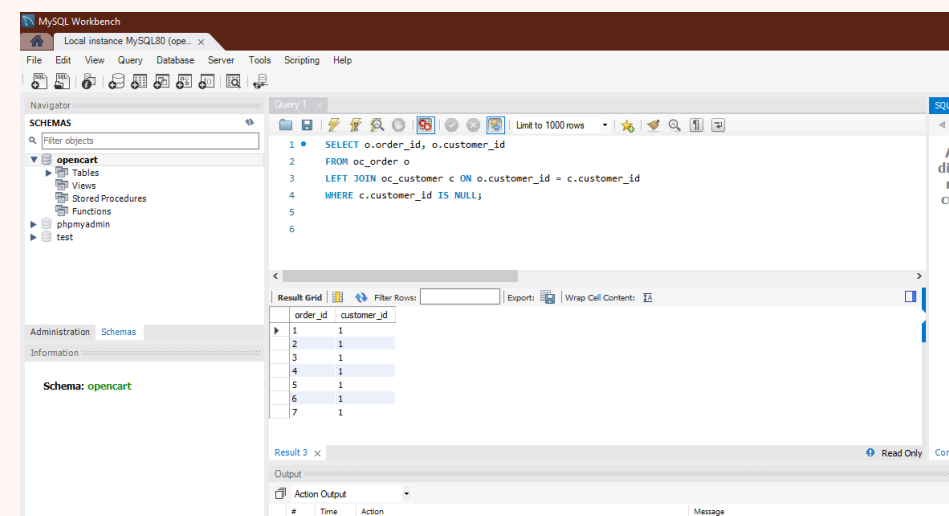

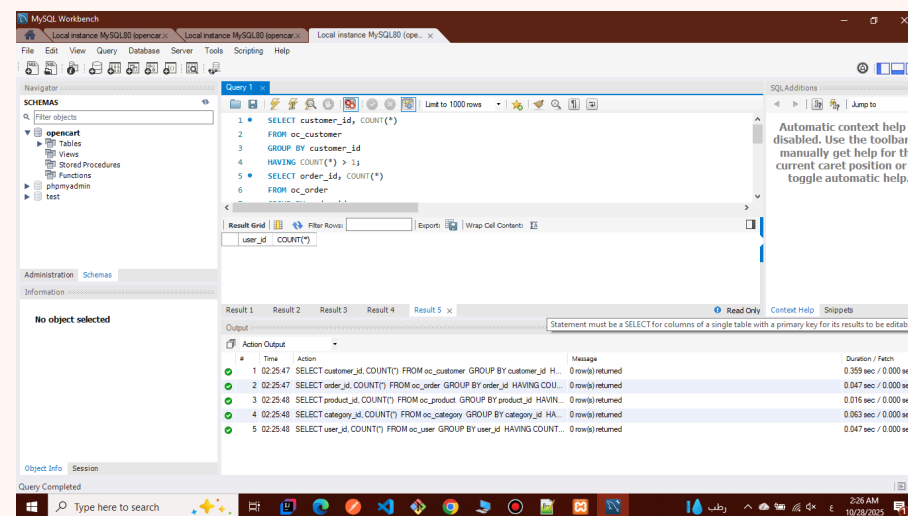

Our sprints

DataBaseTesting:

- we make 24 Test cases and divided the sheet between us.
- we Test the Database and we used :
- MY Sql & My PHP My admin

- The sum of Test cases is 24 = Passed 24 and Failed 0

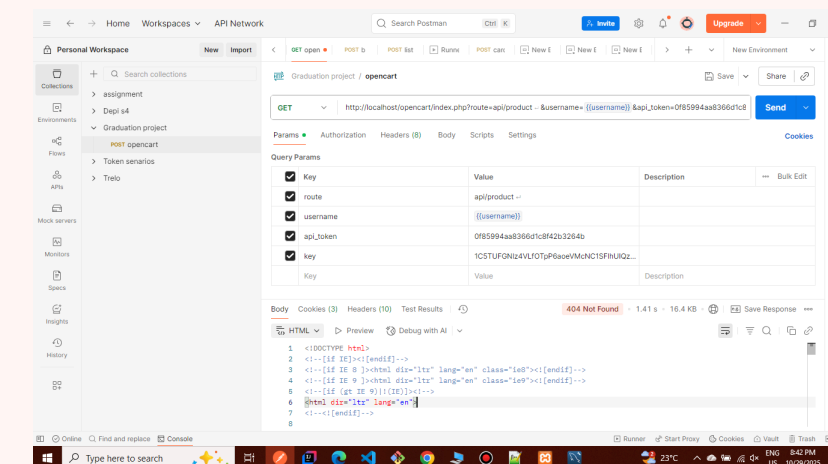

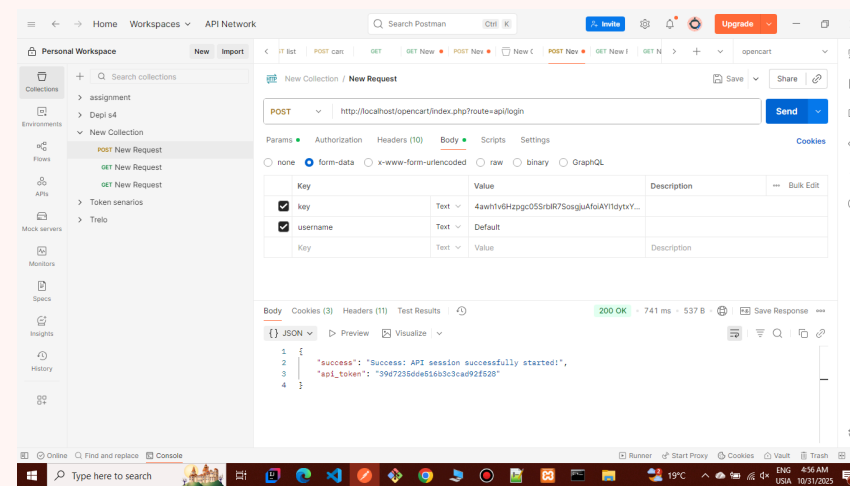

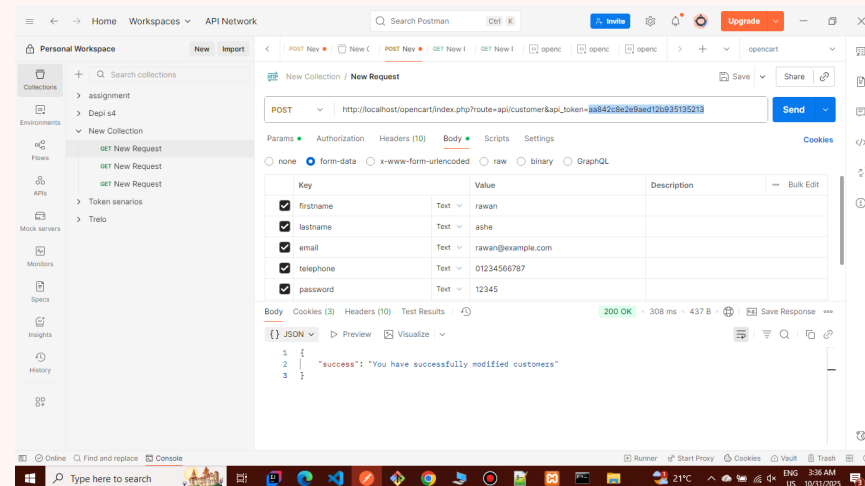

Our sprints

Api Testing:

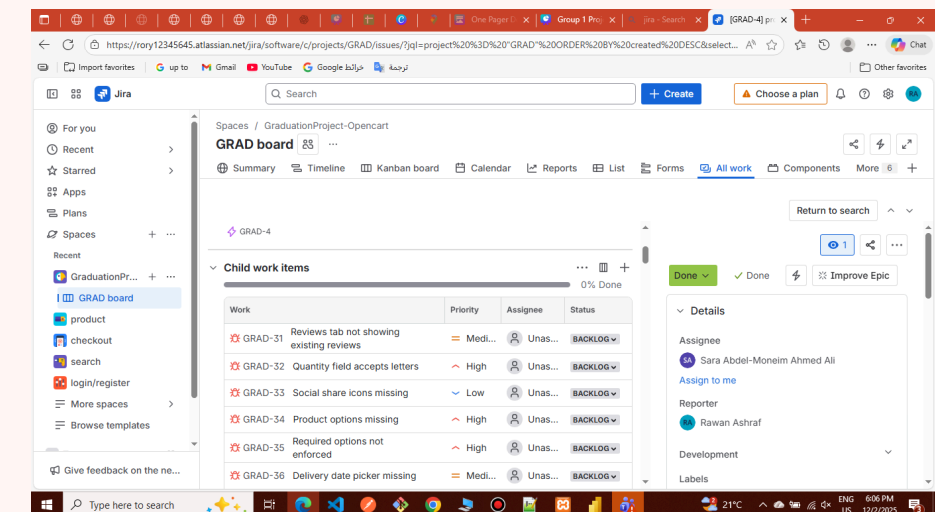

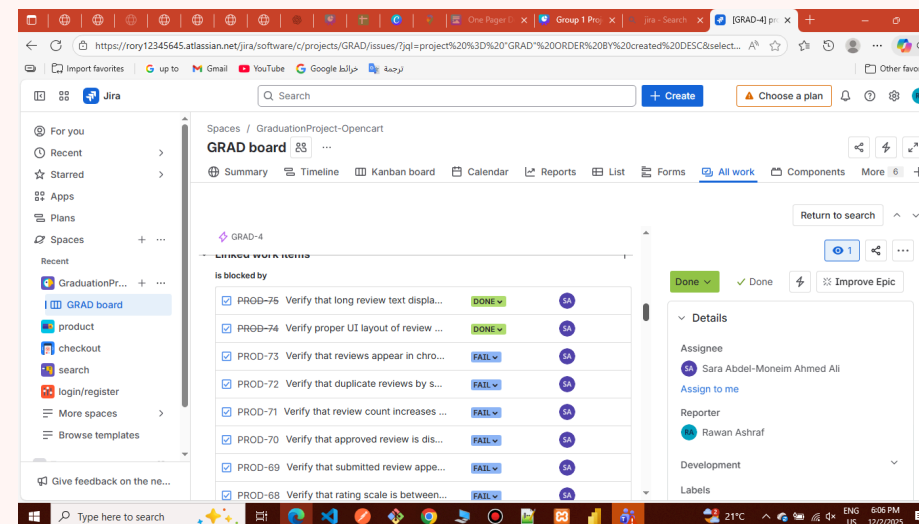

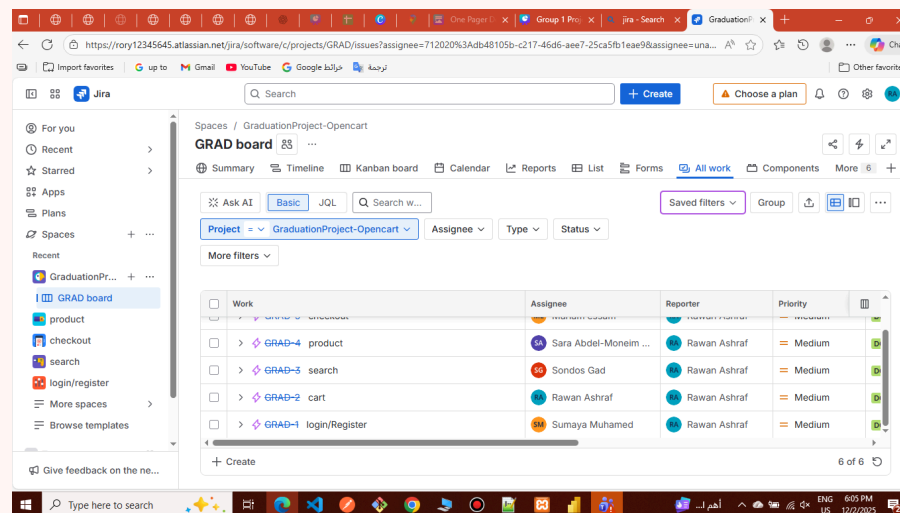

- we make 23 Test cases and divided the sheet between us.
- we Test the Api we used :
- PostMan and we add extention free from open cart marketplase

- The sum of Test cases is 23 = Passed 14 and Failed 9

- we used jira throughout the project where we uploaded all our Test cases and Bug reports
- we make 6 carts under the six main features which made the workflow smoother and kept every step easy to track and review

BUG REPORT

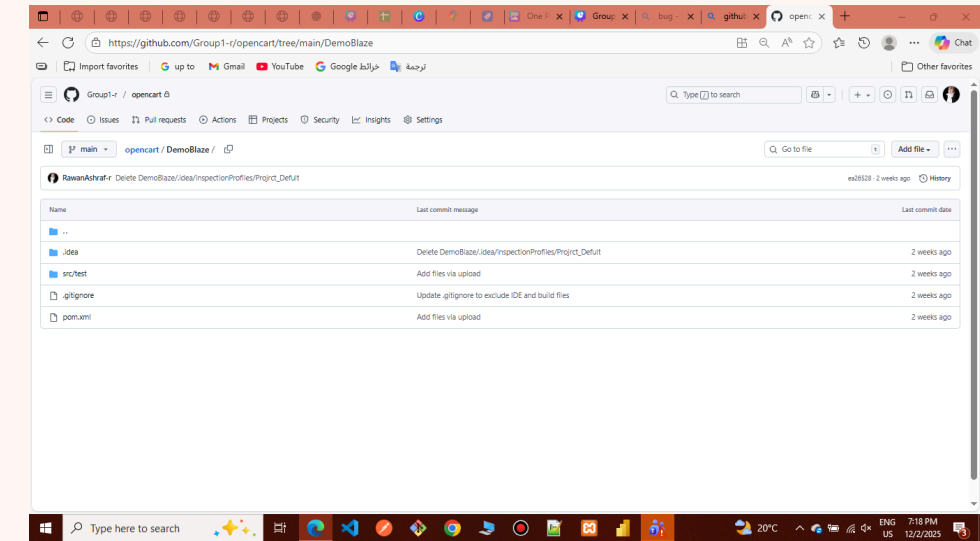

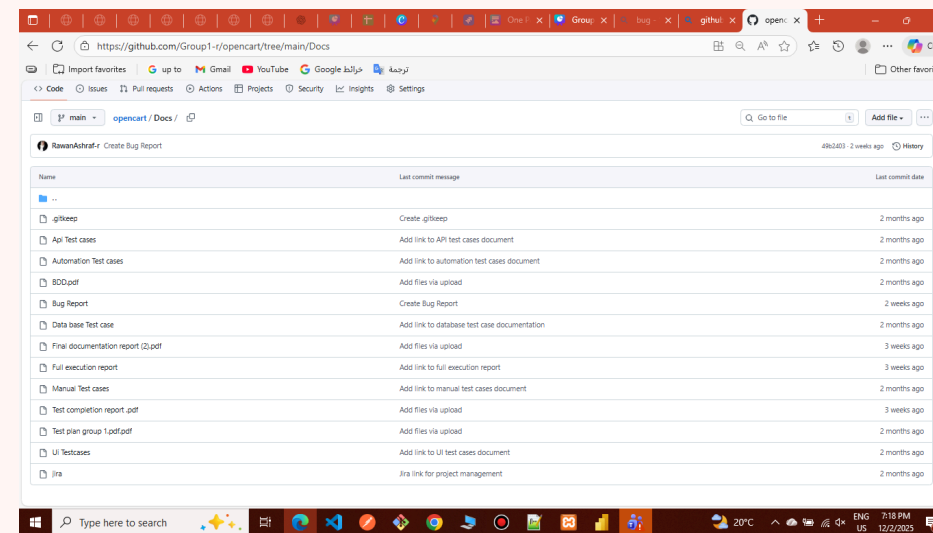

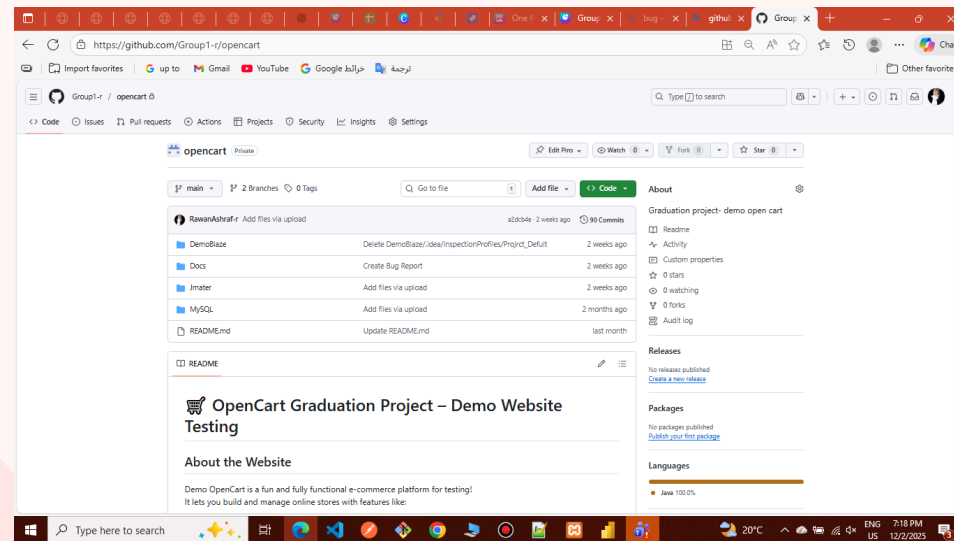

we documented every issue through a structured Bug report
each bug was recorded with clear steps to reproduce **the expected , actual results , severity, priority, enviroment details,**
and we supporting with **screen shots and screen video** for the bug

GIT HUB

We uploaded all our work to GitHub the entire manual testing suite, API testing, database testing, the Jira link, the test plan, test completion report, full execution, documentation, and everything related to the project. All our bug reports were also documented on Jira, and the automation work, including Cucumber and the full POM structure, was added to GitHub as well. In short, every part of the project was organized and uploaded clearly on GitHub.

DOCUMENTATIONS

1 of 3	Test Completion Report
GROUP1	
Introduction	
This report provides a comprehensive summary of the testing activities conducted on the OpenCart website hosted on localhost. The objective of this testing effort was to ensure that all core functionalities, API endpoints, database operations, and user interface elements work as expected and meet the defined requirements.	
Objective	
1. Validate the overall functionality of the OpenCart application. 2. Ensure data integrity between frontend and backend systems. 3. Verify API responses and database consistency. 4. Identify and document any defects for correction.	
Scope of Testing	
The testing activities covered the following areas: • Manual Testing: Verifying all user-facing features and workflows. • API Testing: Validating communication between frontend and backend. • Database Testing: Ensuring data consistency and correctness. • UI Testing: Checking the visual design, alignment, and responsiveness of pages.	
Testing Tools	

1- Test completion report

FINAL DOCUMENTATION REPORT	GROUP 1
-------------------------------	---------

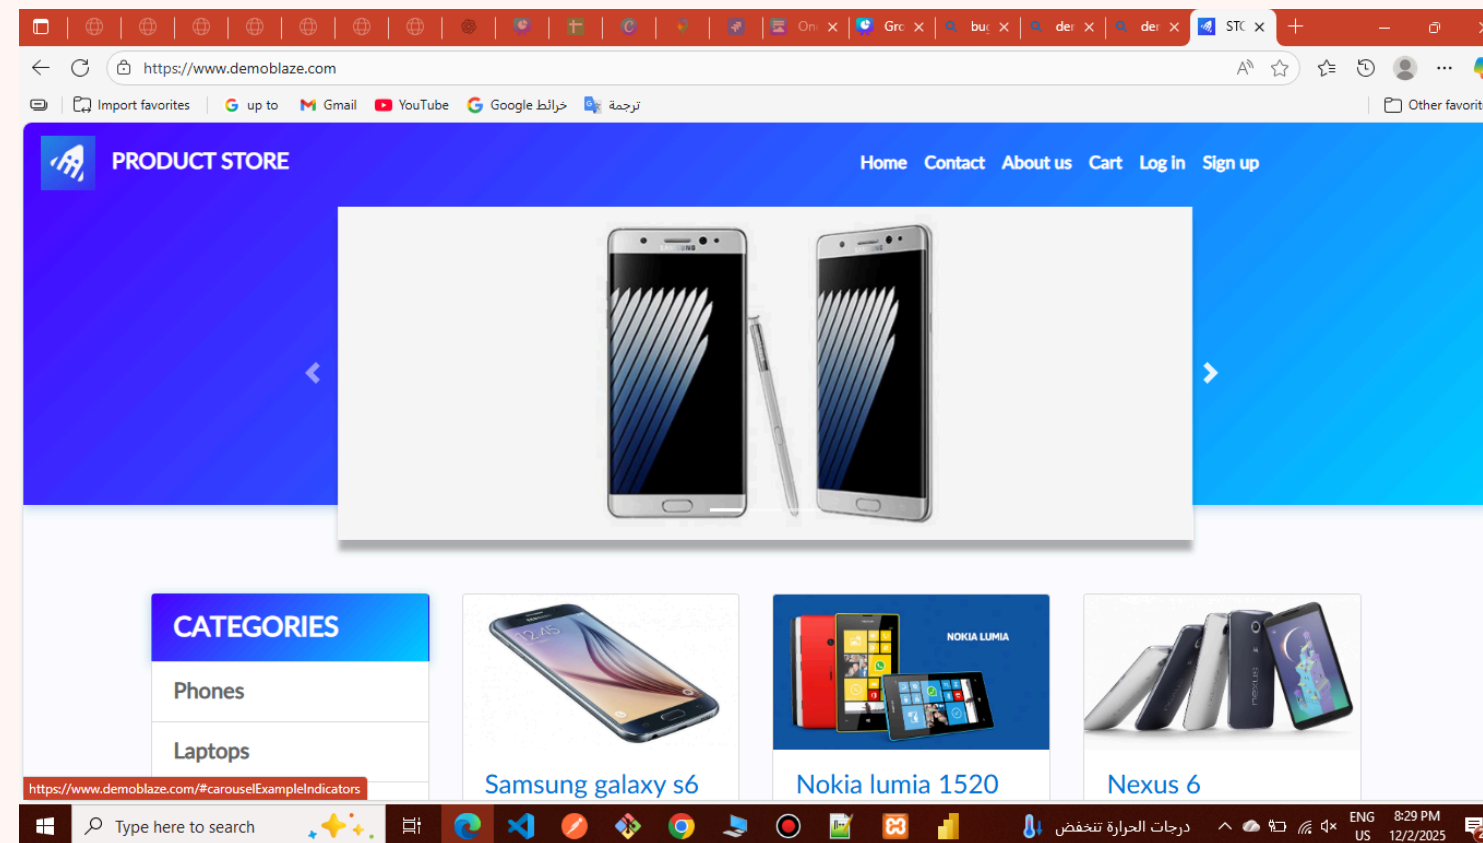

2- final documentation report

Type	Total cases	Pass	Fail
Manual Test cases	367	321	46
Api Test cases	23	14	9
DataBase Test cases	24	24	=
UI Test cases	41	39	2
Total	455	398	57
Test Case Description	Pre-condition	Roles	Test data
Verify that the Register Account page opens successfully	User is not logged in	User	Not Applicable
Verify all required fields are present	1-User is not logged in 2-Registration page is open	User	Not Applicable
Register with valid data	1-User is not logged in 2-Registration page is open	User	First Name: team Last Name:1 Email: depiteam111@gmail.co Password: Test@12345
Register with missing First Name	1-User is not logged in 2-Registration page is open	User	First Name: Last Name: 1 Email: depiteam111@gmail.co Password: Test@12345
Register with missing Last Name	1-User is not logged in 2-Registration page is open	User	First Name: team Last Name: Email: depiteam111@gmail.co Password: Test@12345
Register with invalid email format	1-User is not logged in 2-Registration page is open	User	First Name: Last Name:1 Email: depiteam111@gmail.co Password: Test@12345
Register without accepting Privacy Policy	1-User is not logged in 2-Registration page is open	User	First Name: team Last Name:1 Email: depiteam111@gmail.co Password: Test@12345
Verify password length validation	1-User is not logged in 2-Registration page is open	User	First Name: team Last Name:1 Email: depiteam111@gmail.co Password: Test@12345
Verify password field is masked	1-User is not logged in 2-Registration page is open	User	Password:Test@12345
Verify the "Newsletter Subscription" toggle works	User is on the Register page	User	Not Applicable
y the "Continue" button is clickable only when Privacy Policy is accepted	User is on Register page	User	Valid registration data
Verify duplicate email registration is not allowed	User already registered with a specific email	User	Email: depiteam111@gmail.co
Verify registration fails with empty form submission	Register page opened	User	Not Applicable
Verify Privacy Policy link opens correctly	Register page opened	User	Not Applicable

3-full execution report

Our Sprints

We used Demoblaze website in automation & performance testing

AUTOMATION

Testing (DemoBlaze)

Tools & Framework:
Selenium WebDriver
Java

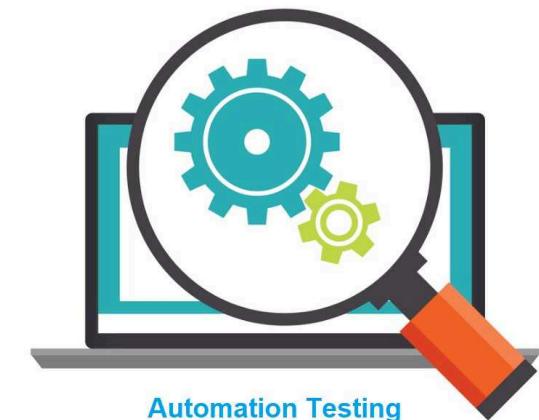

Page Object Model (POM)

Covered: Login, Products, Cart ,HomePage, Signup,Contact page, PlaceOrder

Cucumber

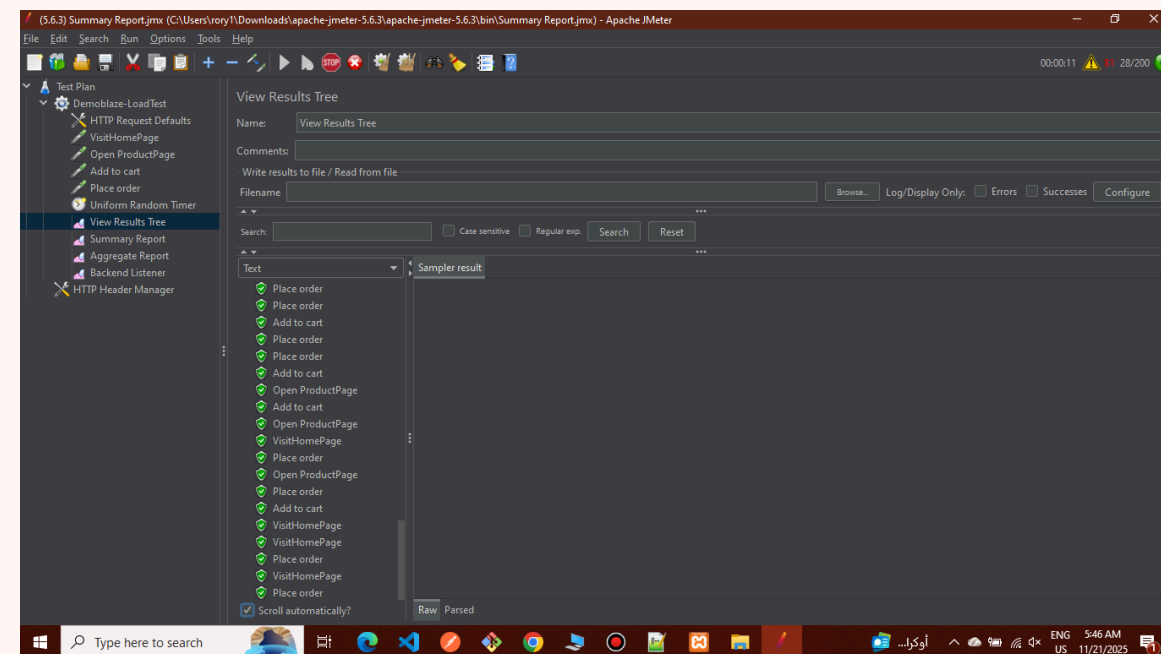

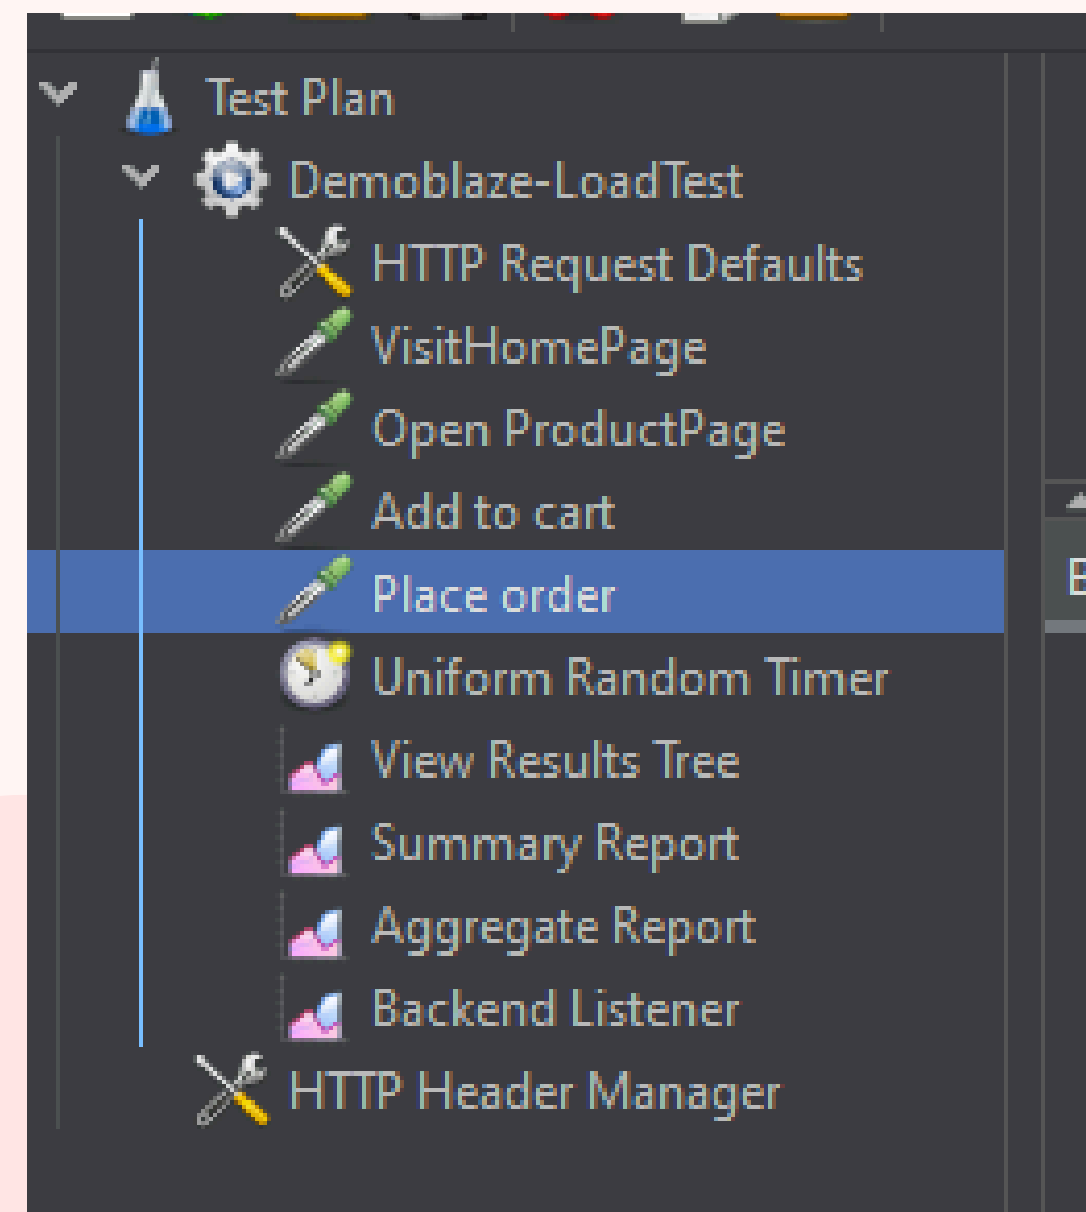

Covered: Login, Products, Cart,HomePage, Signup,

Performance

- we used JMeter to Test the website performance
- we test when great number of Users enter in same time
- Enter Home Page , Open products , add to cart,place order in same time

Thank you
